

Roadmap to a SunSmart workplace

Protecting workers from UV exposure

Learn how to make your workplace sun safe and find helpful resources to guide you.

1. Understand the risk

What you can do:

- understand the health risks posed by UV exposure
- understand your organisation's WHS and legal obligations.

Resources to help

- [Animation with risk details](#)
- [Risk statistics infographic](#)

Remember:

- small steps toward sun safety can make a big difference
- check in with workers and get their feedback on any changes or new ideas they may have
- celebrate the wins and share them with workers and leaders.

2. Assess and commit

What you can do:

- assess your workplace risk levels
- identify areas for improvement
- get the support and resources you need
- put a sun safety policy in place.

Resources to help

- [Workplace UV risk & opportunities assessment](#)
- [Pitch decision-makers for resources](#)
- [Easy SunSmart policy template](#)

3. Plan, prevent and protect

What you can do:

- understand the different controls you can put in place
- collaborate with workers to develop initiatives
- create a sun safe action plan.

Resources to help

- [Hierarchy of control](#)
- [SunSmart action plan](#)

4. Educate and support workers

What you can do:

- get key risk and safety messages out to workers
- keep sun safety top of mind with posters and through other channels (social media etc)
- engage workers with learning (toolbox talks, quizzes).
